ONCE UPON A TIME...

More than 130 years ago, Jöns Petter Magnusson bought a small wool spinning mill in Klippan. It was the start of a long journey which has lasted for five generations.
We spin, we dye, we warp, we weave, we brush, and all in our own factory…

The art of weaving throws and blankets is not new, but it is a production process that involves many steps and high precision. At Klippan Yllefabrik we have had the privilege to develop our experience and refine our quality over five generations of family ownership. We are proud to have developed a wide range of home textiles made from start to finish in our own factory giving us full control of the production process and quality. We now sell world wide.

Our factory is modern, but without losing the touch of craftsmanship. This enables us to be quick, flexible and innovative. We can dye and weave small lots which is the reason why we can keep up with the latest trends and launch a wide selection of new items each season. Additionally we work closely together with well-known textile designers and weaving experts to create a unique and interesting product range with a unique style.
We care deeply about

ANIMAL WELFARE

We do not buy wool from farmers who practice mulesing. We only use pure wool. We would never dream of blending with synthetic fibers.
GOTLAND WOOL
We have developed a collection made of the rare and unique Gotland wool. Gotland sheep are a Swedish breed, dating back to the Viking era. The wool is wonderfully thick, glossy and silky with colors that are different shades of natural grey.

ECO WOOL
We were among the first to offer throws and blankets made of eco wool. Eco wool means that the breeding of sheep and handling of wool must meet specific requirements. No trace of pesticides is allowed in the wool. The sheep must be given only natural food and no antibiotics may be used for breeding.

MERINO WOOL
Merino is a famous traditional breed of sheep originally from Spain. It is still considered to provide the finest and softest sheep wool. You can find Merino sheep in many countries around the world, one of them being Mongolia. The environment that the sheep live in is important for the quality of the fiber. Large grazing areas and exercise gives the thin and fine fiber that characterize merino wool.

CASHMERE
Our premium range has been extended with throws of cashmere. Cashmere comes from a special goat and rearing takes place primarily in various parts of Asia. This is the most exclusive fiber of them all. It is strong and heat-insulating, while being wonderfully soft and light.

LAMBS WOOL
Our classic wool throws are made of New Zealand lambs wool. It is no coincidence that New Zealand belongs to the world’s largest wool producing countries. Their landscape is especially suitable for sheep farming. The sheep are outside all year round and grazing grass in the lush landscape. It makes the wool become thick, clean and really white.

ORGANIC COTTON
All our cotton blankets are made from organic cotton. This means that the cotton is cultivated without the use of artificial fertilizers or pesticides.

NOT JUST ANY WOOL
Finding the right kind of wool requires extensive experience. And that we’ve got – in fact 130 years of it.
We review and select wool from different parts of the world to get the quality of the fiber that we want.
CLASSIC WOOL THROWS & BLANKETS
Wool is a decomposable fiber, which makes it an environmentally friendly alternative. The fiber is also naturally moist and dirt repellent, making wool suitable for most climates and easy to care for. Our classic wool throws and blankets are made of 100% lambs wool.

The definition of lambs wool is the first cut of a sheep that is no older than six months.

Wool is the fiber closest to our heart. If treated right, wool can last for a very long time. To maintain the special qualities of the wool fiber, you should try to wash it as little as possible. The best way when you need to freshen your wool throw is to hang it out to air. For more information on how to care for your wool products, please visit www.klippanyllefabrik.com
